All Pause Booking Report (APBR) Data Dictionary

The “pause booking by attributes” feature introduced the need to surface the results of who paused and un-paused a specific booking queue. Below is a data dictionary for the reporting fields returned by the APBR report.

Data Dictionary

Field Name	Data Type	Description
id	GUID	Unique identifier of the pause booking rule
timestamp	Date/Time	Timestamp indicating when the pause booking rule was created
userId	GUID	Unique identifier of the user that created the pause book rule
userRoles	Text	Comma delimited list of rules assigned to the user that created the pause book rule
